SUMMARY

With 17 years in the IT field, I specialize in web development using PHP, JavaScript, Python, SQL, MySQL, CodeIgniter, and Laravel. I build and maintain scalable web applications, databases, and backend systems using these technologies. My experience includes:

- Developing custom web solutions with PHP frameworks (CodeIgniter, Laravel)
- Working with databases (SQL) and optimizing queries
- Writing clean, efficient code in Python for automation and scripting
- Troubleshooting and improving existing systems

I enjoy solving problems, mentoring teammates, and creating efficient software that helps businesses run smoothly.

EXPERIENCE

Senior System Programmer

Zamazemah Co.

May 2024 to Present
